Office Action Summary	Application No. 10/517,409	Applicant(s) ANDERSSON, STEFAN	
	Examiner Robert A. Coker	Art Unit 3616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I – Figures 1 and 2;

Group II – Figures 3 and 4;

Group III – Figures 5 and 6;

Group IV – Figures 7 and 8;

Group V – Figures 9 and 10; and

Group VI – Figures 11 and 12.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 3, 4, 5, 6 and 8 are drawn to Group I;

Claims 3 and 4 are drawn to Group II;

Claim 7 is drawn to Group III;

Claim 8 is drawn to Group IV;

Claim 9 is drawn to Group V; and

Claims 10 and 11 are drawn to Group VI.

The following claims appear to be generic: 1, 2, 12, 13 and 14.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

While it is true that the species share the common feature that they are all airbag-venting devices, this is not a special technical feature, since airbag venting is old and well known in the art and the manner in which they do this is completely different from each other.

In Group I, the retainer (11) does the airbag venting;

In Group II, the airbag venting is done by the piston and cylinder;

In Group III, the explosive bolt does the airbag venting;

In Group IV, the airbag venting is done by the retainer and drive mechanism (40);

In Group V, the airbag venting is done by the expandable element (50); and

In Group VI, the airbag venting is done by the expandable bellows arrangement (60).

The shared features of increasing the gap between the gas generator and the support plate to create airbag venting are all old and well known in the airbag art and as such are not special technical features.
